

Liteboho Solutions Website

Overview

This project is the official website for Liteboho Solutions, a construction company specializing in infrastructure repairs, construction, engineering, and roadworks. The website aims to present the company's portfolio, highlight their services, and allow potential clients to connect easily.

Features

1. Home Page: Brief introduction and highlights of the company's values and expertise.
2. About Us: Detailed information about Liteboho Solutions, including their background, mission, and team.
3. Portfolio: Showcases the company's completed projects, giving users a comprehensive look at their work quality and experience.
4. Services: Provides descriptions of all services offered and allows users to book appointments directly.
5. Contact Us: Users can reach out via a contact form that links directly to Liteboho Solutions for inquiries and consultations.
6. AI Chat Bot: An AI-powered chat bot is available to assist users in navigating the website and answering frequently asked questions.
7. Language Translator: Google-powered language translator for users to switch between languages seamlessly.

Technologies Used

- Frontend: HTML, CSS, JavaScript

Deployment

The website is hosted on a cloud server with SSL certificates for secure data transmission. Users can access it via the official domain.

Usage Instructions

1. Viewing Pages: Navigate through the main menu to explore each page.

2. Making Contact: Use the contact form on the “Contact Us” page to get in touch with the company. Information is securely sent to Liteboho Solutions’ team.
3. Booking Services: Book an appointment through the “Services” page for a specific service.
4. Using the Chat Bot: Click the chat icon on any page to interact with the AI bot for assistance.
5. Language Options: Select your preferred language through the translator on the top right of the website.

Troubleshooting

- Translation Issues: If the translation appears incorrect, refresh the page or try another language.
- Contact Form Errors: Ensure all fields are filled out correctly; an error message will display if any information is missing or invalid.
